

6 ACKNOWLEDGMENT

The author acknowledges the considerate help given

by Mr. P. A. Rasmussen during the preparation of this work, and the suggestions and support given by Dr. M. Otala.

THE AUTHOR

Terje Sandstrøm was born in Oslo, Norway, in 1956. From 1975 to 1979 he worked as a design engineer at Electrocompaniet, Oslo. In 1979 he started his own consulting company. From 1977 to 1979 he attended the Oslo Engineering High School, majoring in telecommunication. He continued studying physics part time at the University of Oslo, and is working toward a cand. scient. degree. His major thesis is on nonlinear

circuit theory with special attention to low-frequency amplifiers.

His interests include computer-aided design and analysis, data-base theory, amplifier design, and topics within measurement and instrumentation. At the 1981 and 1982 European Conventions of the AES he presented papers on circuit theory. He is an associate member of the AES and a member of the IEEE.
